Professional Summary

Computer Science undergraduate experienced in full-stack development using the MERN stack, with hands-on experience building React.js, Node.js, Express.js, and MongoDB applications with REST APIs, authentication, testing, debugging, and Linux deployment. Developed AI-driven applications using Python, NLP, LLaMA 3, Ollama, and multi-agent systems, including a five-agent pipeline for scientific literature analysis. Experienced in developing software applications across frontend, backend, database, and AI workflows, with 50+ LeetCode problems demonstrating continued problem-solving practice.

Technical Skills

Programming: Python, Java, JavaScript, TypeScript, SQL

Core Computer Science: Programming Fundamentals, Object-Oriented Programming, DBMS

Web Development: React.js, Node.js, Express.js, HTML, CSS, REST APIs

Databases: MongoDB, MySQL

AI & Machine Learning: Scikit-learn, TensorFlow, NLP, LLaMA 3, Ollama

Cloud Platforms: AWS, Microsoft Azure

Tools & Platforms: Git, GitHub, Linux, VS Code

Professional Skills: Problem Solving, Analytical Thinking, Learning and Adaptability, Team Collaboration, Communication

Experience

Software Engineer Intern – SANSI RF and Communication Systems

Mar 2026 – Jul 2026

- Engineered a full-stack web application using React.js and Node.js with REST API integration to support business workflows.
- Developed reusable frontend components and backend services based on business requirements, followed by application testing and debugging.
- Deployed and hosted the application on a Raspberry Pi running Linux, enabling reliable access across the local network.

Agentic AI Intern – Woxsen University

Dec 2025 – Mar 2026

- Engineered a modular multi-agent AI system in Python for automated hypothesis generation from scientific literature using LLaMA 3 and Ollama.
- Orchestrated a sequential pipeline of five specialized agents for literature mining, data analysis, reasoning, hypothesis generation, and evaluation.
- Automated document-processing workflows using PyMuPDF and Pandas, with a NetworkX-based knowledge graph to extract and represent relationships from research papers.
- Developed an interactive Streamlit interface for document upload, literature analysis, knowledge graph visualization, hypothesis generation, and evaluation.

Projects

SmartHire – MERN Stack AI Recruitment Platform

- Engineered a full-stack recruitment platform using the MERN stack (MongoDB, Express.js, React.js, and Node.js) to streamline candidate screening and recruiter workflows.
- Designed and implemented RESTful APIs for communication between frontend and backend components.
- Implemented JWT-based authentication and authorization to secure application access and API communication.

FloodGuard AI – Real-Time Flood Monitoring Platform

- Developed a full-stack web platform using React, TypeScript, and Express.js to monitor traffic-camera feeds and present flood-risk information through an interactive dashboard.
- Built REST and WebSocket endpoints with database integration for real-time event handling, alerts, and dashboard updates.
- Designed modular workflows for flood detection, risk classification, multilingual alert generation, and notification workflows.

DocParseWeb – Document Parsing and Extraction System

- Developed an end-to-end document processing system using Python, FastAPI, PyMuPDF, and MongoDB to parse PDFs and generate structured JSON outputs.
- Implemented REST APIs for document upload, parsing, retrieval, and deletion, supporting multi-page document processing.
- Built a modular architecture separating PDF parsing, database operations, API routes, and web-based document management.

Education

Woxsen University, Hyderabad

2023 – 2027

B.Tech in Computer Science

CGPA: 9.15/10

VKDVS Raju Junior College

2023

Intermediate

98.7%

Surya Public School

2021

SSC

95%

Achievements

- Solved 50+ problems on LeetCode, strengthening problem-solving skills.
- Volunteer Mentor – Elevate 4.0, Woxsen University.
- Participated in Hacksavvy-24 Hackathon, MGIT.

Certifications

- Introduction to Java – LearnQuest
- Database Management Essentials – University of Colorado System
- Introduction to NoSQL Databases – IBM
- Introduction to TensorFlow for Artificial Intelligence, Machine Learning, and Deep Learning – DeepLearning.AI

Hobbies & Interests

Hobbies: Gaming, Watching Movies, Drawing, Dancing

Interests: Software Engineering, Full-Stack Development, Artificial Intelligence
